Acceptance and Excellence

TITA SANITARYWARES PVT. LTD. has established itself as a prominent player in the global market, renowned for delivering verified high-quality products to customers. With an impressive track record, TITA SANITARYWARES has achieved significant success in international markets, thanks to the expertise of our experienced sales, marketing, service, and building industry professionals. As we strive to become global market leaders, our commitment to quality is unwavering. To maintain a competitive edge, our representatives diligently source products from around the world, ensuring we offer superior appearance, quality, and pricing to our valued customers.

AN ISO 9001 : 2008 CERTIFIED COMPANY

Flush Technology

Siphonic

Tornado with
Siphonic

Siphonic technology revolutionizes the flushing performance of toilets, ensuring efficient waste removal with minimal water usage. The strategic positioning of the trapway and the shape of the bowl work together to create a siphonic action that maximizes the flow of water and waste expulsion. By utilizing the principles of siphoning, TITA's Siphonic toilets create a powerful suction force that effectively pulls waste from the bowl. This innovative design optimizes the use of water, reducing consumption while maintaining excellent flushing performance.

This advanced flush technology combines the power of a tornado-like vortex and the siphonic principle to deliver exceptional flushing performance. The Tornado with Siphonic toilets gives a strong suction that successfully removes waste from the bowl. This technology is designed with environmental sustainability, as it reduces water consumption without compromising performance. We are revolutionizing the flushing experience by offering efficient, powerful, and eco-friendly solutions for residential and commercial applications.

Wash Down

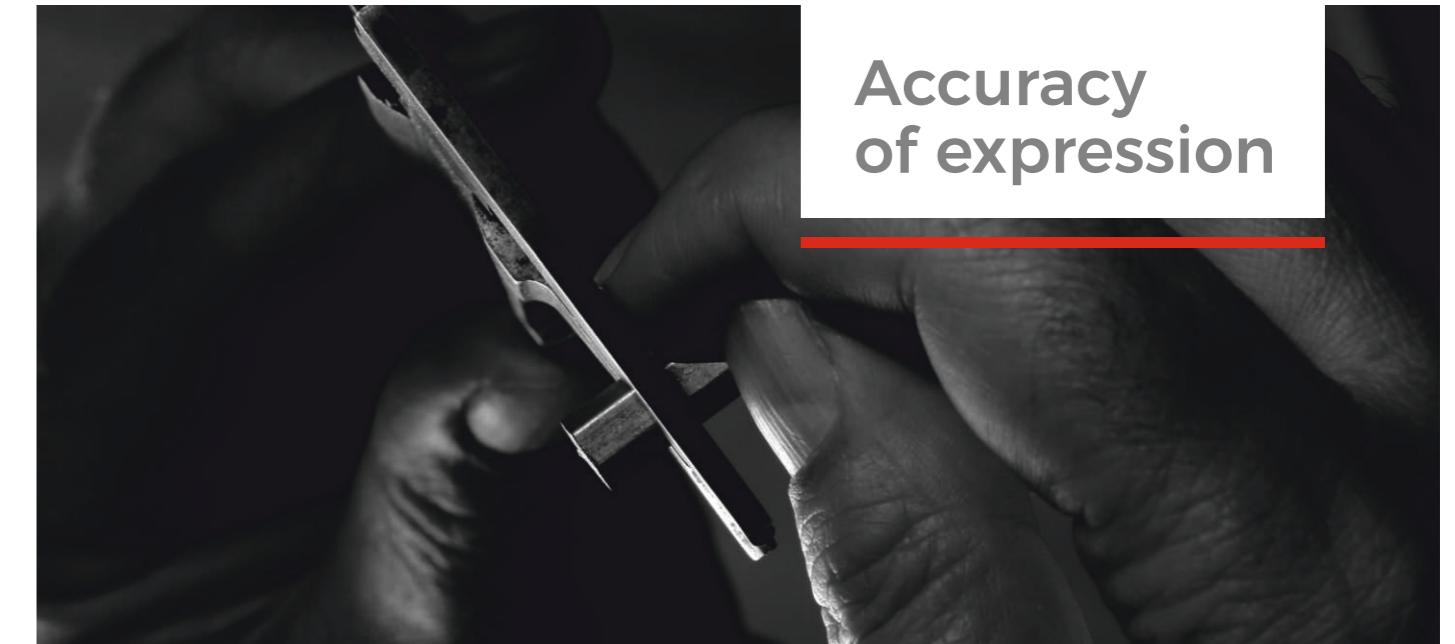

Rimless
Wash Down

Wash Down technology provides a reliable and efficient flushing system that ensures thorough waste removal. TITA's Wash Down toilets, water enters the bowl from various strategically positioned rim holes or jets. This influx of water creates a forceful downward flow, effectively rinsing away waste and debris. The design of the bowl and the precise positioning of the water outlets optimize the cleaning action, leaving the bowl clean and fresh.

TITA's Rimless Washdown toilets feature a smooth, rim-free interior that provides a more thorough and hygienic cleaning experience. The washdown flushing mechanism efficiently directs water throughout the bowl, effectively removing waste and ensuring optimal cleanliness. TITA's Rimless Washdown technology represents a significant leap forward in toilet design, offering enhanced hygiene, effortless maintenance, and a modern aesthetic for residential and commercial settings.

**Accuracy
of expression**

Our Technology

"Crafted with the most advanced tools" - Human hands. We believe that machine-made products can not give enough experience which hand made gives. That's why we, as Tita and our designer, have imagined each piece from beginning to end. The thoughtfulness extends to the buyer/end user, who experiences all effort and skill. Handmade products are high in quality not just because of their price but because makers understand the value of each piece, and highly skilled creators of handmade item care greatly about the quality and materials they use.

Tita Technology

Tita Clean Technology

NORMAL SURFACE

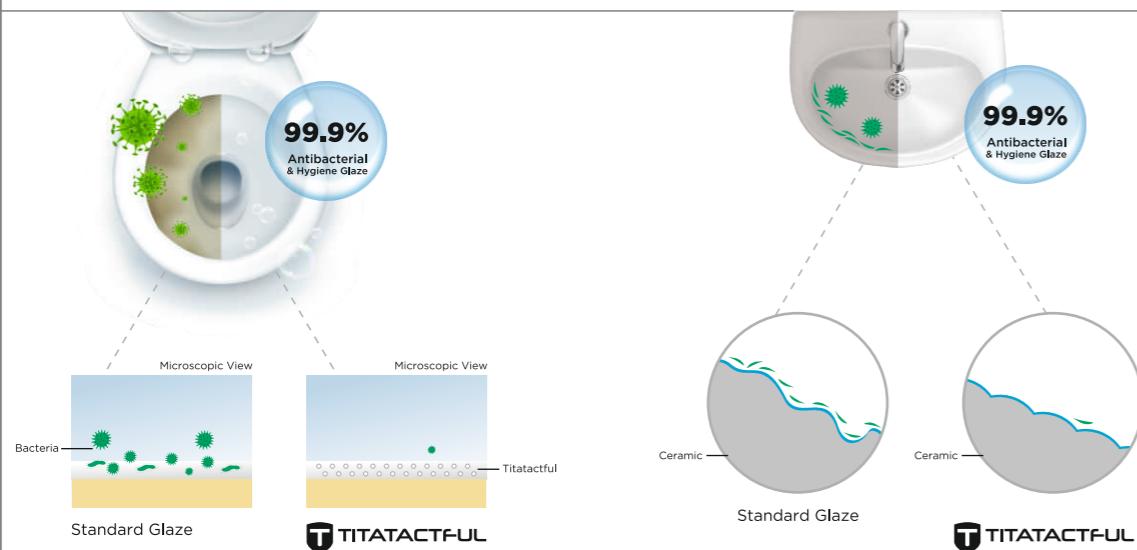

TITA CLEAN SURFACE

TITA research and development team has a new technologically advanced compound called - "TITA CLEAN TECHNOLOGY". These compounds are used inside and outside with an extra layer of coating, which helps to reduce the accumulation of germs and bacteria with self-reduction of 99%. The TITA CLEAN and extra coating layer help increase strength and minimize the porous surface inherent in ceramics. The first layer of the compound is sprayed white and fills any gaps that might be present before the heat treatment process. We apply a third layer that makes the ceramic's surface smoother.

More
Precisely

TITA Company introduces an innovative and remarkable technology that addresses the demands of the present time. With a strong focus on clay technology, TITA has made significant advancements in enhancing properties such as purification, aging, and bacterial action. The introduction of TITACTFUL ensures that waste finds no surface to cling to, effortlessly sliding off the bowl and being carried away upon flushing. Our commitment to environmental preservation is evident as we prioritize using bacteria-free materials, providing our clients with a hygienic and nature-friendly solution.

SERIES

TITANIUM

Titanium Series has been set in motion, which combines the latest technology and gives you a luxurious experience at your fingertips.

PREMIO

TITA has launched its novel Premio series to meet the requirements of modish society.

MAJANDUS

In that concern, Majandus series has come into the picture to satisfy every need of all kinds & classes of people.

ICON

Easy To Clean

Our design team made the product with clay and added additional coating, which made for easy to clean and refresh your bathroom experience.

Dual Flush System

The dual flushing will save 40% of water and gives you the same cleanliness by using 6 ltr rather than 10 ltr. an ultimate solution for saving water.

Anti-Bacterial

At TITA, our engineering and R & D team work together to update the hygiene experience for end users and an additional coating to make the product bacteria-free and easy to clean.

60% Water Save

Save 60% Water approx 4 ltr in a single flush to clean all.

Soft Close

Our design team made softer open and close seats, making you feel a smooth open and auto-close experience.

For Women

A lot of questions pop up when people are considering trying a bidet. It is one of the most valuable inventions for women.

Rimless

Our R&D team thinks about how much easier it would be to clean if there is no rim, so we have introduced a wide range of rimless toilets.

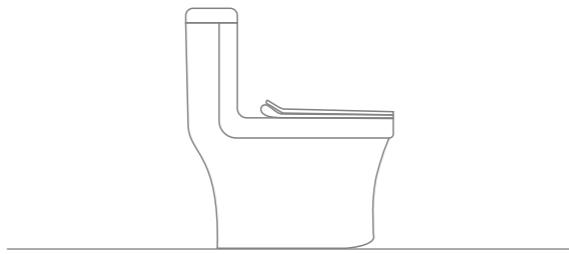

For Kids

Our range of product designs is made with perfect dimensions and heights, which are easy to use for kids as well.
